Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material:	May 30, 2008
Date of First Availability of Post-Conversion Material:	May 30, 2008

The date of "First Availability of Post-Conversion Material" is the projected date that a customer may expect to receive the Post-Conversion Materials. This date is determined by the projected depletion of inventory at the time of the PCN publication. The depletion of inventory may be impacted by fluctuating supply and demand, therefore, although customers should be prepared to receive the Post-Converted Materials on this date, Intel will continue to ship and customers may continue to receive the pre-converted materials until the inventory has been depleted.

Description of Change to the Customer:

Update to MAC Address: Incorporate new OUI block on 4965AGN and 4965_AG SKUs as current OUI block will soon be depleted.

00 - 1F - 3B	00 - 21 - 5C

Customer Impact of Change and Recommended Action:

Customer will receive product with the following changes:

1. New MAC addresses with a change in the first 6 characters. Refer to the below table for the affected product codes.

Current	New
00 – 1F – 3B	00 – 21 – 5C

2. Dash to the TA#

Intel will attempt to deplete pre-conversion material before shipping post-conversion material but there is a possibility of Intel shipping mixed inventory. Therefore, customers will need to manage and migrate to the post-conversion material as soon as possible.
